Patient: **Trax Hodgson**

Sex: **Male** Age **1** Species: **Dog** Breed: **Labrador Retriever**

Chart ID#:

HISTORY: Pelvic radiographs. checking hip conformation

PELVIS 11/17/08: One extended-hip ventrodorsal view is provided. Coxofemoral joint congruity is excellent bilaterally. There is no evidence of osteoarthritis or transitional vertebrae.

Conclusions: Normal coxofemoral joints.

If there are discrepancies between this report and your impressions please call to discuss the case. Thank you.

Michael Roy, DVM, Dip. ACVR, MS  
Radiologist
